EDUCATION

Government College Dharmshala <i>Bachelor of Technology in Computer Science Engineering; GPA: 7.7/10.0</i>	Kangra, Himachal Pradesh, India August 2024 – June 2026
Government Polytechnic Sundernagar <i>Diploma in Computer Science Engineering; Percentage: 73%</i>	Sundernagar, Himachal Pradesh, India Nov 2020 – June 2023

TECHNICAL SKILLS

Languages: JavaScript (ES6+), Typescript, HTML5, CSS3, SQL, Java, C++
Frontend Technologies: React.js, Redux, REST APIs, Responsive Web Design, Tailwind CSS
Backend Technologies: Node.js, Express.js, REST API Design, Authentication (JWT/Sessions)
Tools & Technologies: Git, GitHub, VS Code, Chrome DevTools, npm, Webpack, Babel
Core Competencies: Object-Oriented Programming, Data Structures & Algorithms, Web Performance Optimization, UI/UX Design Principles, Agile Development, Code Review

EXPERIENCE

Gocoder <i>Full Stack Engineer Intern</i>	January 2026 – Present <i>Remote, India</i>
- Engineered reusable React.js component library with Tailwind CSS, reducing UI development time and ensuring consistent cross-device rendering across mobile and desktop breakpoints. - Designed and integrated RESTful APIs using Axios, implementing dynamic client-side routing, form validation, and error handling – improving overall user flow and reducing failed form submissions. - Built full CRUD backend modules with Node.js, Express.js, and MongoDB, including schema design, input validation, and authentication middleware using JWT, supporting core product features end-to-end. - Participated in agile sprints in a remote team – managed tasks via Git branching workflows, conducted peer code reviews, and resolved 10+ cross-browser and responsiveness bugs across production builds.	

PROJECTS

<u>TabMind – Chrome Extension for Tab Context Management</u>	
<i>React.js, JavaScript, Vite, Chrome Extensions API (chrome.storage, chrome.alarms, chrome.notifications)</i>	
- Developed a Chrome extension that enables users to tag tabs by intent (Research, Study, Shopping, Watch Later, Custom) and attach notes, improving tab organization and context retention. - Implemented reminder automation using chrome.alarms and chrome.notifications to deliver time-based alerts (1hr, 2hr, tonight, tomorrow) and help users revisit important tabs on schedule. - Built a searchable React dashboard with category-based grouping/filtering and persistent local storage via chrome.storage.local for efficient tab retrieval across browsing sessions.	
<u>Visualization of Data Structures and Algorithms</u>	
<i>MERN Stack (MongoDB, Express.js, React, Node.js), Canvas API, Algorithm Animation</i>	
- Built a full-stack DSA visualizer using React, Vite, Tailwind CSS, and Express, implementing 10 algorithms across sorting, searching, and graph traversal. - Engineered step-based animation controls with play, pause, seek, and speed tuning, plus real-time metrics for comparisons, swaps, reads, and writes. - Developed an integrated assistant API and chat UI to explain algorithm complexity, pseudocode, and JavaScript implementations, improving concept learning and revision.	

CERTIFICATIONS

<u>JavaScript Algorithms and Data Structures</u> <i>freeCodeCamp</i>	2024
<u>React JS Certification</u> <i>GeeksforGeeks</i>	2025

ACHIEVEMENTS & LEADERSHIP

Earned certifications in JavaScript (freeCodeCamp) and React.js (GeeksforGeeks); consistently practicing DSA to sharpen problem-solving skills.
Problem Solving: Developed strong analytical and debugging skills through algorithmic challenges and real-world bug fixes.
